### Why Choose Us

#### Quality and Value

DumpsTests Practice Exams are written to the highest standards of technical accuracy, using only certified subject matter experts and published authors for development - no all dumps.

#### Tested and Approved

We are committed to the process of vendor and third party approvals. We believe professionals and executives alike deserve the confidence of quality coverage these authorizations provide.

#### Easy to Pass

If you prepare for the exams using our DumpsTests testing engine, it is easy to succeed for all certifications in the first attempt. You don't have to deal with all dumps or any free torrent / rapidshare all stuff.

#### Try Before Buy

DumpsTests offers free demo of each product. You can check out the interface, question quality and usability of our practice exams before you decide to buy.

As a busy-working man I have no time and heart to prepare so I purchase braindumps for CPIM-SMR. I pass exam just one day's preparation. Great!

Laura

### Try Before You Buy

Download a free sample of any of our exam questions and answers

- ✓ 24/7 customer support, Secure shopping site
- ✓ Free One year updates to match real exam scenarios
- ✓ If you failed your exam after buying our products we will refund the full amount back to you.

Pass the Actual Test with the Latest Vce Torrent at first attempt

**Exam** : **C9060-528**

**Title** : IBM Spectrum Protect V8.1  
Administration

**Vendor** : IBM

**Version** : DEMO

**NO.1** Which statement is true regarding the location of deduplication statistics information?

- A.** QUERY ACTLOG shows the amount of space saved by server side deduplication.
- B.** QUERY ACTLOG shows the total data reduction ratio.
- C.** QUERY STGPOOL shows the total data reduction ratio.
- D.** QUERY STGPOOL shows the total number of deduplicated files.

**Answer:** C

Explanation

QUERY STGPOOL (Query storage pools)

Use this command to display information about one or more storage pools.

The " QUERY STGPOOL" server command may not show the correct inline dedup and compression statistics for directory-container storage pools, erroneously reporting all these values as zero (percentage) like in the following example:

Storage Pool Name: DIRCONTPOOL

Storage Pool Type: Primary

Storage Type: DIRECTORY

Deduplication Savings: 0 (0%)

Compression Savings: 0 (0%)

Total Space Saved: 0 (0%)

**NO.2** To enable the sending of email notifications with SET ALERTMAIL ON, what must be configured first?

- A.** DEFINE or UPDATE the hub server with ALERT=EMAIL
- B.** Check the ENABLE EMAIL box in the Alert Configuration tab
- C.** REGISTER or Update the administrator with ALERT=YES MAILADDRESS=email\_address
- D.** Add INCLUDE.ALERTMAIL to the include-exclude list

**Answer:** C

Explanation

For each administrator ID that must receive email notification, issue one of the following commands to activate email notification and to specify the email address:

```
REGISTER ADMIN admin_name ALERT=YES EMAILADDRESS=email_address
```

Or

```
UPDATE ADMIN admin_name ALERT=YES EMAILADDRESS=email_address
```

**NO.3** What are the steps to review the client logs for a particular node from the Operations Center using the client management services?

- A.** On the Operations Center menu bar, click Clients. From the list of nodes obtained, double click the appropriate client node and select Diagnosis.
- B.** On the Operations Center menu bar, click Diagnosis. Then look for the appropriate to review the logs.
- C.** On the operations Center menu bar, click Diagnosis. Then click Clients and then double click the appropriate client node name.

**D.** On the Operations Center menu bar, click Clients. Then select Diagnosis.

**Answer:** A

Explanation

You can access client log files from the Operations Center and get recommendations about how to solve client errors.

To diagnose client errors, complete the following steps:

**NO.4** Which option in the dsmserv.opt specifies the location of the active log directory?

**A.** ACTIVELOGDIRECTORY

**B.** ARCHFAILOVERLOGDIRECTORY

**C.** ACTLOGDIRECTORY

**D.** ARCHIVELOGDIRECTORY

**Answer:** A

Explanation

ACTIVELOGDIRECTORY

The new directory for the location where the active log is stored. Use this option to change the location of the active log.

**NO.5** Which file must be edited to configure Disaster Recovery Manager?

**A.** RECOVERY.INSTRUCTIONS.STORAGE

**B.** RECOVERY.INSTRUCTIONS.INSTALL

**C.** RECOVERY.INSTRUCTIONS.TAPE

**D.** RECOVERY.INSTRUCTIONS.PRIMARY

**Answer:** B

Explanation

Disaster Recovery Manager configurations include:

RECOVERY.INSTRUCTIONS.INSTALL - for TSM server installation. It contains instructions such as passwords, hardware/software requirements, fix levels, and so on.

**NO.6** What is the purpose of a container-copy storage pool?

**A.** To protect a cloud-container storage pool in a single server environment

**B.** To protect a directory-container storage pool in a single server environment

**C.** To protect a directory-container storage pool in a single-server environment that uses replication

**D.** To protect a cloud-container storage pool in a multi-server environment that uses replication

**Answer:** C

**NO.7** How would an administrator restore data to a different node?

**A.** use the filespace -newnode option

**B.** use the GRANT ACCESS command to allow access to another node

C. use the -fromnode option

D. use the -tonode option

**Answer:** C

Explanation

Restoring or retrieving files from another client node

If you are using commands, use the fromnode and fromowner options to indicate the node name and the name of the user who owns the files.

For example, to restore files to one of your own file systems that were backed up from a workstation named Node1 and owned by a user named Ann, enter:

```
dsmc restore -fromn=node1 -fromo=ann "/home/proj/*" /home/gillis/
```

**NO.8** The following copygroup parameters are set:

Verexist: 5

Verdeleted: 2

RetainExtra: 3

Retainonly: 60

Which statement is true if a file no longer exists in a node?

A. 60 versions of the file will be available for restore

B. 5 versions of the file will be available for restore

C. 2 versions of the file will be available for restore

D. 30 versions of the file will be available for restore

**Answer:** C

Explanation

Reference <https://www-304.ibm.com/support/docview.wss?uid=swg21224145>

**NO.9** What is the purpose of the UPDATE NODE <nodename> BKREPLRULEDEFAULT=<new rule name> server command?

A. update the node settings by changing the default replication rule for Space Management data

B. update the node settings by changing both the default replication rule for backing up and archiving data

C. update the node settings by changing the default replication rule for archiving data

D. update the node settings by changing the default replication rule for backing up data

**Answer:** D

Explanation

BKREPLRuledefault specifies the replication rule for backup data.

ARREPLRuledefault specifies the replication rule for archive data.

SPREPLRuledefault specifies the replication rule for space-managed data.

**NO.10** On an IBM Spectrum Protect AIX server, which utility can be used to identify disk bottlenecks?

A. Perfstat

**B.** Perfmon

**C.** Nmon

**D.** Monitor

**Answer:** C
